

The European BNCT Project

18th August 2008

**International Workshop on:
Positron Emission Tomography
for Boron Neutron Capture Therapy**

8th November 2008, Pisa, Italy

Dear Colleague,

On behalf of the organizing committee, we would like to invite you to attend this workshop, organised under the auspices of the Enlargement and Integration Action of the Joint Research Centre of the European Commission, which will be held on 8th November 2008 in Pisa (Italy). It is organized as a satellite meeting of the 13th ICNCT in Florence. Pisa can be easily reached by car (85km) and train from Florence.

PET using [F-18]FBPA has an increasing importance in the selection of patients for clinical trials and will be of growing interest for treatment planning. On the other hand, the use of this drug in patients adds another challenge to BNCT trials. Technical aspects, clinical experiences and regulatory restrictions will be presented and discussed during this one-day meeting.

For our preparations, we need to know the number of the participants. Please register now if you are interested to join the workshop using the form attached.

If you need further detailed information, please contact: Ray Moss, IE/JRC, Petten (email: raymond.moss@jrc.nl)

If you are interested to present your own data, please send a short abstract (1 page) to Wolfgang Sauerwein, University Duisburg-Essen (email: w.sauerwein@uni-due.de)

The local organizers are: Piero Salvatore, Luca Menichetti and Luca Cionini

You may visit the webpage <http://bnctweb.jrc.nl/> that will be updated with more information, when available.

Yours sincerely,

R.L.Moss, M.Sc., Ph.D.

Prof. Dr. med. Wolfgang Sauerwein
